Home for Sale in the Pinery Neighborhood – Parker, Colorado

Invite yourself to step inside the grand foyer and onto the hardwood flooring of this stunning 4,300 square-foot home. As you walk, the natural light expands across the gorgeous spiral staircase and up to the soaring ceilings. This four-bedroom, four-bath home has been impeccably maintained.

Inside, the open floor plan offers endless ways to entertain with formal dining and living spaces, a family room with charming built-ins, and direct access to the outside deck.

The kitchen showcases a new refrigerator, a convenient center island with gas cooktop, double drawer dishwasher, and pull-out-drawer pantry.

Let's head upstairs, shall we? This living space boasts 4 bedrooms, 4 bathrooms, and a bonus room. The oversized Primary Suite enters into double doors and a grand view of the Rocky Mountains. It has a private entry suite, 5-piece bathroom set, and large walk-in closet. Two more sizable secondary bedrooms and another full bathroom completes the upstairs.

Need a main-floor office space as well? This home has it – complete with French doors, wainscoting, built-in bookshelves, and a scenic bay window. *Queue the deer!*

Also on the main floor, you're treated to a huge mudroom, washer and dryer, and a spacious three car garage – for that extra fridge and ping pong table, should you so choose (extra fridge and ping pong table not included ☐)

Winter Bonus! No snow shoveling for the new owners with a south-facing driveway, plus a radiant heat system that melts the snow for you.

The basement – it's finished and with plenty of space. Downstairs includes a recreation room, one large bedroom, a full bath, plus an exercise room.

On to the spacious backyard. Here we'll find low-maintenance decking, custom railings, and an expansive yard to recreate. The surrounding area is full of mature trees, greenery, and fencing.

Yes, there's more:

- New Windows and Doors by Renewal by Andersen (2022).
