

# December 21st, 2017 Winter Solstice

## Winter Solstice

**When:** December 21, 2017

Winter Solstice is the beginning of winter and is the shortest day of the year. In the North Pole the sun doesn't rise at all today! However the southern hemisphere is starting summer and has peak sunshine. The great thing about the Winter Solstice is each day after today we gain sunlight!

Osgood Team chooses to embrace the Winter Solstice and enjoy all the amazing winter activities Colorado has to offer! From skiing, snow shoeing, sledding, building snowman, and just a good old fashioned snow ball fight! We love Colorado and love our clients!

We are never too busy for your referrals!
