

Local Chiropractor Opens Doors in Parker Station Building

Welcome to Heath Chiropractic and Acupuncture, which just recently relocated to Parker Station in downtown Parker – the same building where the Osgood Team is located!

Owner [Dr. Heidi Heath](#) is absolutely fabulous at what she does. A native Coloradan who was raised in Castle Rock, Dr. Heidi knows first-hand what it's like to suffer from pain. In fact, that's what led her to pursue a career as a chiropractor and acupuncturist.

✘ When she was growing up, she had chronic low back pain, which wasn't being relieved with traditional medicine. In her search for relief, she discovered that regular chiropractic care and acupuncture treatments did the trick. She was so pleased with the success of the care and treatments that she decided she wanted to make a career of helping others who suffered similar pain.

Of course, she treats more than just low back pain. While she specializes in treating headaches and chronic pain, her gentle and non-invasive techniques have also been successful in treating everything from muscle spasms to sports injuries to auto injuries to morning sickness, fatigue, vertigo and TMJ disorders.

She also treats people of all ages, including kids.

If you've been having issues with pain, headaches or just generally aren't feeling good, I highly recommend a visit with Dr. Heidi. Her goal is to tailor your treatment to your individual health and wellness, using all sorts of natural solutions to many common health problems. And she'll even teach you about ways to live healthy so your body can function at its optimum level.

Dr. Heidi Heath can be reached 720-287-1251. Her office is

conveniently located in Parker Station, 19751 E. Mainstreet Suite 343.

You also can learn more about Dr. Heidi, and her techniques and training on her website at <http://www.heathchiro.com/>.

If you do have a need to see Dr. Heidi, please tell her Leanne sent you!
