

# New Homes Available in Wonderful Parker Community

At a time when the inventory of homes for sale is low, I'm happy to spread the word about some new home construction going on in Canterbury Crossing in Parker.

Village Homes is offering 37 single family homes as part of its Hometown Collection at Canterbury Crossing. What's cool about these homes is that a majority of them back up to protected open space, giving the owners a bit of privacy and some fantastic views.

☒ ☒ ☒ The homes start in the \$300's – a great buy for this neighborhood that offers it all. It's conveniently located just east of downtown Parker, has numerous parks, a private pool, local trails and fantastic schools.

As you head out to explore the area, you'll also get the added benefit of viewing the unique contours of the land that are highlighted throughout the area and Black Bear Golf Course.

A Village home is a home worth considering. The company offers well-constructed homes that are tastefully designed with wonderful interior finishes and that are energy efficient, the latter of which is always a huge selling point for me.

Completion dates vary on the homes that are currently under construction. Some are even completed and move-in ready. If you'd like to tour these new additions to a popular Parker community, please give me a call at 303.810.5757.
