Large treed lot with backyard retreat is exactly why everyone loves living in the Pinery

# Neighborhood!

Walk up to the covered front patio and enter your comfortable new home. Enjoy the 2-story foyer as you journey to the eat-in kitchen open to the family room which features a wood burning fireplace. The main floor also offers formal living and dining areas as well as a powder bath.

Take a stroll upstairs to the very private and spacious master bedroom – no problem with your king bed here. Notice the romantic wood burning fireplace before you check out the 5-piece master bath with a separate water closet and over-sized walk-in closet. The other two upstairs bedrooms share a full

sized bath right off the generous landing.

Your upstairs bonus...a huge storage room above the 3-car garage, the perfect place to store holiday decorations and have easy access. Now it's time to go see the partially finished basement with a sizable laundry area and an additional area that could be made into a fourth bedroom or

used as an office or workout area.

The 3-car garage benefits from a utility door that opens into the fenced backyard. Saving the best for last – relax under the covered patio or step up to the large open uncovered wood deck and take in the beautiful Colorado sunshine or starry night skies. There are also opportunities to sit under the mature trees and take in the expanse of your third of an acre. This is Pinery living! If you've been waiting to own in the Pinery, here is your chance!
